Examiner's Amendment

An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it must be submitted no later than the payment of the Issue Fee.

Withdrawn claims 3-5 are cancelled as being drawn to non-elected species.

It is emphasized that as presently amended, claim 1 is no longer generic since it now includes an air assembly shown only in conjunction with the Figure 2 species.

Reasons For Allowance

The invention in this case involves a vaporization chamber assembly for injecting a vaporized aqueous mixture into a flue gas stream from a power plant. In addition to the limitations previously recited, all claims have now been amended to include a so-called "air assembly" for pressurizing the aqueous mixture in a vaporized state. The expression "air assembly" could be subject to a wide variety of different interpretations, but for the purpose of claim analysis, applicant's disclosure (Figure 2 and related portions of the specification) was heavily relied upon to determine what applicant means by an "air assembly". claimed elements is not disclosed or fairly suggested by any of the cited references, and the claims are therefore considered patentable over the prior art.
